INVESTMENT OBJECTIVE AND STRATEGY

The Fund intends to achieve for its PERA participants liquidity and income that is higher than that of regular time deposit products by investing in a diversified mix of peso-denominated deposits, which are tax-exempt in accordance with the PERA Law, and shall have a maximum weighted average fund duration of one year. The Fund's composite benchmark is composed of average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes.

CLIENT SUITABILITY

A client profiling process is performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are encouraged to update the resulting profile every three (3) years or if there's any change in his/her personal/financial circumstances. Before deciding to invest, clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, or seek an independent/professional opinion when necessary.

The METROBANK PERA MONEY MARKET FUND is suitable only for investors who:

- Have a Conservative profile.
- Want liquidity but are willing to take on minimal volatility in exchange for slightly better returns than regular time deposit products.
- Recommended investment horizon is at least six (6) months
- Filipino individuals with legal capacity to contract and possesses a Tax Identification Number (TIN)

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Interest Rate Risk:	The possibility for an investor to experience losses due to changes in interest rates. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates.
Market/Price Risk:	The possibility for an investor to experience losses due to changes in the market prices of bonds. It refers to the portfolio's exposure to marked-to-market valuation due to market price fluctuations of the bonds.
Liquidity Risk:	The possibility for an investor to experience losses due to the inability to sell or convert assets into cash immediately or in instances where conversion to cash is possible but at a price that could result in a loss. This may be caused by low trading volume due to different reasons such as securities with small or few outstanding issues, absence of buyers and/or sellers (limited buy/sell activity) or underdeveloped capital market.
Credit Risk / Default Risk:	The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of fixed income security which the borrower issued. This inability of the borrower or counterparty to make good on its financial obligations may have resulted from adverse changes in its financial condition thus, lowering credit quality of the security, and consequently lowering the price (market/price risk) which contributes to the difficulty in selling such security.
Reinvestment Risk:	The possibility of having lower returns or earnings when funds mature and are reinvested. Investors in the UITF who redeem and realize their gains run the risk of reinvesting their funds in an alternative investment outlet with lower yields. Similarly, the UIT fund manager is faced with the risk of not being able to find better yielding alternative investment outlets as some of the securities in the fund matures.
Other Risks:	Your participation in the UITFs may be further exposed to the risk of any actual or potential conflicts of interest in the handling of in-house or related party transactions by Metrobank. These transactions may include own-bank deposits; purchase of own-institution or affiliate obligations (stocks, mortgages); purchase of assets from or sales to own institution, directors, officers, subsidiaries, affiliates or other related interests/parties; or purchases or sales between fiduciary/managed accounts.

The Fund invests only in high-credit quality assets which are evaluated using a rigorous internal scoring model required under the Trustee's accreditation process and BSP regulations. Internal risk limits and position limits together with regulatory exposure limits are monitored, reviewed and strictly adhered to on a daily basis. The Fund may also use financial derivatives solely for hedging risk exposures.

THE UIT FUND IS NOT A DEPOSIT AND IS NOT INSURED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).

RETURNS CANNOT BE GUARANTEED AND HISTORICAL NAVPU IS FOR ILLUSTRATION OF NAVPU MOVEMENTS/FLUCTUATIONS ONLY.

WHEN REDEEMING, THE PROCEEDS MAY BE WORTH LESS THAN THE ORIGINAL INVESTMENT AND ANY LOSSES WILL BE SOLELY FOR THE ACCOUNT OF THE CLIENT.

THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.

FUND PERFORMANCE AND STATISTICS as of February 29, 2024

(Purely for reference purposes and is not a guarantee of future results)

NAVPu GRAPH

NAVPu OVER THE PAST 12 MONTHS

Highest	1.048147
Lowest	1.009781

STATISTICS

Weighted Average Duration (in years)	0.49
Volatility, Past 1 Year (in %) ²	0.41%
Sharpe Ratio ³	-2.74
Information Ratio ⁴	-0.96

² Volatility measures the degree to which the Fund fluctuates vis-à-vis its average return over a period of time. The lower the number, the more stable the Fund's return is relative to its average return over time. Starting December 2017, computation is based on the annualized standard deviation of monthly returns.

³ Sharpe Ratio is used to characterize how well the return of a Fund compensates the investor for the level of risk taken. The higher the number, the better.

⁴ Information Ratio measures reward-to-risk efficiency of the portfolio relative to the benchmark. The higher the number, the higher the reward per unit of risk.

CUMULATIVE PERFORMANCE

	1 Month	3 Months	6 Months	1 Year	3 Years	5 Years	Since Inception ⁵
Fund	0.299%	0.962%	2.198%	4.110%	5.129%	N/A	5.137%
Benchmark	0.369%	1.050%	2.217%	4.564%	7.801%	N/A	8.151%

⁵ Initial benchmark adopted was Bloomberg Philippines 30-day Special Savings Rate General Average beginning October 1, 2020. The Fund changed its benchmark to average rate of the most recent 91-day Philippine Treasury Bill auction, net of taxes on December 1, 2020.

PORTFOLIO COMPOSITION

Allocation	% of Fund
Government Securities	93.19%
Time Deposits	3.31%
Cash	3.52%
Other Receivables - Net of Liabilities ⁶	-0.01%

⁶Includes accrued income from investments, receivables from brokers/counterparties and unpaid expenses.

Maturity Profile

Government Securities <1 year	76.07%
Government Securities >1 year - 3 years	17.11%

HOLDINGS

INVESTMENT POLICY

The Fund may be invested and reinvested in the following instruments:

- Deposits and special savings
- BSP deposit facilities
- Government Securities

OUTLOOK AND STRATEGY

The big news for February : The new 5-year Retail Treasury Bond (RTB 5-18) with final coupon of 6.25% payable quarterly and will mature on 28 February 2029. And keeping in tune with the love month, this security might be “the one” to lock in, especially with rate cuts expectation this year. The Bureau of Treasury (BTr) was able to successfully issue a total of PhP585Bn for this RTB, including both fresh money and swap options for RTB 3-11 (maturity 9 Mar 2024) and RTB 5-12 (maturity 12 Mar 2024). In other local news, the result of the first Monetary Board meeting for 2024 was released, where as widely expected by market players, the BSP kept rates unchanged, still at 6.50% for the 3rd straight meeting. The BSP slightly lowered its risk-adjusted inflation estimates for 2024 to 3.9%, previously at 4.2% but slightly increased the estimate for 2025 to 3.5%, previously at 3.4%. The BSP continue to signal the need to keep monetary policy tight if necessary, to help anchor both inflation and inflection expectations, amid geopolitical risks, higher rice and electricity prices brought about by El Nino, and higher gasoline prices. With this guidance from the BSP, the country's February inflation print rose faster than expected indeed at 3.4% YoY versus 3.0% market consensus and higher than January's print of 2.8%. This latest print is still within the BSP's inflation target of 2% to 4%. The main driver for the higher print was rice inflation which was up by a whopping 23.7% YoY, the fastest in 15 years (since February 2009).

In news overseas, we highlight the release of the January FOMC and ECB minutes. The FOMC minutes showed policy makers sentiment that significant progress has been made on their fight against inflation and that the tightening cycle has peaked, but most participants noted the risks of moving too quickly to ease the stance of policy and emphasized the importance of carefully assessing incoming data in judging whether inflation is moving down sustainably to their 2% target. Market players continue to price at least 75bps of FED easing this 2024. While the ECB minutes showed that rate cuts in spring this year are highly unlikely. Instead, the ECB wants to wait until 1Q2024 data confirms receding inflationary pressure, a modest economic recovery and no acceleration of wage growth to slightly reduce the current monetary policy restrictiveness : The risk of cutting policy rates too early was still seen as outweighing that of cutting too late.

There were supposed to be 5 Treasury Bonds (T-Bond) auctions for February : 3y, 5y, 7y, 10y and 20y issuances. The BTr cancelled 3 auctions (5y, 7y and 10y) to give way for the offer period of the new 5y RTB. Only the 3y Re-issuance of FXT3-30 and New 20y FXT2026 were auctioned for the month. What was surprising was that the BTr awarded the new 20y FXT2026 coupon at 6.25%, same rate as the coupon of the new 5y RTB5-18. Tendered bids received were at PhP91.423Bn for this new 20y issuance, or 3.05x oversubscribed. Meanwhile, all the 4 Treasury Bills (T-Bills) auctions for February pushed-thru. The BTr almost fully awarded the target T-Bills issue size for the month, from target PhP62Bn issue size, the BTr awarded at PhP61.3Bn. T-Bills auction average rates awarded were higher by 16bps across all 3 tenors MoM. On the BSP Bills, the 28day and 56-day bills were issued at around 6.76% and 6.73% average respectively, which is a bit lower than the auction averages (6.77%) in January. The Peso Liquidity Funds continue to maximize its exposure in the BSP Bills with yield at at least 6.60%.

IMPORTANT NOTICE

Metropolitan Bank and Trust Company is regulated by the Bangko Sentral ng Pilipinas (BSP).
